

Protect Your Skin with Window Film

Facts About Skin Protection and Window Film

Solar Gard window films have an SPF of 285 or more, making them an ideal solution for protecting your skin.

When applied to your car, home or office they block more than 99% of the sun's damaging UVA and UVB rays.

Effects of direct sunlight

Solar control window film is ideal if you want to protect your skin from the daily onslaught of sunlight. The ultraviolet radiation in sunlight has many negative effects on skin including:

- Causes 90% of all premature skin aging and wrinkles
- Destroys vitamin A in the skin, which contributes to cell damage
- Damages collagen, the structural protein that keeps skin cells firm, causing wrinkles and sagging
- UV is increasingly being linked to skin cancer

Type of UV radiation	Effects
UVA	Skin aging, eye damage, linked to skin cancer
UVB	Sunburn, premature skin aging, eye damage, linked to skin cancer
UVC	Most destructive but mostly stopped by the ozone layer

UV radiation and photosensitive conditions

Solar Gard window film also reduces the harmful effects of sunlight if you suffer from a photosensitive condition. Dozens of these conditions have been identified including:

- Actinic Prurigo
- Bloom Syndrome
- Dermatomyositis
- Discoid Lupus Erythematosus
- Dubowitz Syndrome
- Ichthyosis (Trichothiodystrophy)
- Photosensitive Erythema Multiforme
- Polymorphous Light Eruption
- Systemic Lupus Erythematosus
- Three M Syndrome

Solar control window film is often prescribed for people who cannot tolerate sunlight.

The Skin Cancer Foundation recommends Solar Gard window film to protect healthy skin.

Facts About Solar Gard® Window Film and UV Protection

- UV protection of at least SPF 285¹
- Blocks 99% of UV rays
- Prevents aging associated with sun damage
- Provides year-round sun protection

Other benefits of window film:

- Reduces energy costs associated with air conditioning
- Improves safety and security by holding glass shards intact upon impact
- Increases interior comfort by reducing hot spots

To learn which Solar Gard window film is right for you, find a window film dealer near you or learn more about Solar Gard's skin protection options, visit www.solargard.com/au.

¹ Solar Gard window film's SPF 285+ was determined by the Lawrence Berkeley National Laboratory's window film analysis software program. Films range from 285 to more than 1,000.
